- Phone: +44 11 111 11111

Profile

Noah Williams is a seasoned Full Stack Developer with over 18 years of experience in the technology industry, specializing in both front-end and back-end coding languages. He is proficient in Python, JavaScript, and Elixir, and has extensive knowledge of development frameworks and third-party libraries such as Angular, React, and Node.js. With a strong background in AI, data science, and big data tools including Hadoop, Spark, and Kafka, Noah has led successful deployments of scalable AI solutions and innovative data model development. His expertise in developing and managing well-functioning databases and applications, creating security and data protection settings, and writing effective APIs makes him a perfect fit for roles demanding a strong technical and strategic leader.

Skills

- Proficient in multiple front-end languages and libraries (e.g. HTML/CSS, JavaScript, XML, jQuery)
- Proficient in multiple object-oriented languages (e.g. Java, Python) and multiple frameworks (e.g. Angular, React, Node.js)
- Familiar with databases (e.g. MySQL, MongoDB), web servers (e.g. Apache) and UI/UX design
- Proficient in big data tools, including Hadoop, Spark, Kafka, etc.
- Excellent communication skills in English
- Strong project management and organizational skills
- Understanding of AI/ML models
- Familiarity with data privacy regulations and best practices

Work History

DataKernel: Director of Software Engineering (remote) â€” 2022 - Present

- Successfully led the integration of AI technologies and use of big data tools such as Hadoop, Spark, and Kafka which significantly enhanced product capabilities and market positioning.
- Managed the development of well-functioning databases and applications, creating security and data protection settings that aligned with data privacy regulations and best practices.

InnovPet: Founder & CEO (remote) â€™ 2019 - 2022

- Built a successful IoT solution using MongoDB, showcasing his proficiency in database management.

EliteDevs: Engineering Manager (remote) â€™ 2018 - 2019

- Managed multiple engineering teams, developed and launched a new product using Ruby on Rails and React, highlighting his proficiency in front-end languages and libraries.

BetCraft: CTO â€™ 2013 - 2015

- Led the technology strategy and developed the initial product using both React and Angular, showing his proficiency in multiple frameworks.

Education

MBA in Information Technology

London Business School - MBA

Advanced Leadership Techniques

University of London - Certification

Data Science Specialization

Coursera (Johns Hopkins University) - Certification

B.Sc. in Computer Science

University of Edinburgh - Bachelorâ€™s degree

Noah Williams, with his robust blend of technical and strategic expertise, is an ideal candidate for roles requiring a Full Stack Developer with a strong understanding of AI/ML models and big data tools.
