Create CrewAI for PDF-article.

January 23, 2024

Anonymous

We will pass it this prompt: I want to create a Crew that can reads a PDF URL and create an article very concise with 8–10 paragraphs, with a good title and a call to action to follow me on twitter. Ask me the PDF URL and my Twitter URL.

ChatGPT

To create a CrewAI setup for your project, I'll break down the task into subtasks and assign them to appropriate AI agents within the CrewAI framework. Here's the breakdown:

Main Goal:

Create an article based on a PDF from a given URL. The article should be concise (8–10 paragraphs), have a compelling title, and include a call to action to follow a Twitter account.

User Inputs:

1. **PDF URL:** The URL of the PDF from which the article will be generated.

2. **Twitter URL:** The URL of your Twitter account to be included in the call to action.

Subtasks and Agent Assignments:

1. **PDF Reading and Extraction:**

   - **Agent:** PDF Reader

   - **Task:** Extract and preprocess text from the provided PDF URL.

   - **Capabilities:** Able to read and preprocess PDF documents.

   - **External Tools:** A tool to fetch and extract text from a PDF URL.
