L7: Build a Crew to Tailor Job Applications

In this lesson, you will built your first multi-agent system.

The libraries are already installed in the classroom. If you're running this notebook on your own machine, you can install the following:

`!pip install crewai==0.28.8 crewai_tools==0.1.6 langchain_community==0.0.29`

```
In [1]:  from IPython.display import Markdown, display
         import os
         from time import time
         import json
         from pprint import pprint

         # import crewai    # Version: 0.30.11
         from crewai import Agent, Task, Crew, Process
         from crewai_tools import SerperDevTool

         from crewai_tools import (
             SerperDevTool, ScrapeWebsiteTool, WebsiteSearchTool, MDXSearchTool,
             DirectoryReadTool, FileReadTool, BaseTool
         )

         from langchain_openai import ChatOpenAI

         from pydantic import BaseModel

         from api_key_store import ApiKeyStore
         from helper import convert_to_filename

         # Warning control
         import warnings
         warnings.filterwarnings('ignore')
```

- Import libraries, APIs and LLM

```python
In [2]:   s = ApiKeyStore()

          os.environ["OPENAI_API_KEY"] = s.get_api_key(provider="OPENAI")   # os.environ["API_KEY_OPENAI"]
          os.environ["SERPER_API_KEY"] = s.get_api_key(provider="SerpApi")  # os.environ["API_KEY_SERPAPI"]

          model_name = "gpt-3.5-turbo"
          os.environ["OPENAI_MODEL_NAME"] = model_name    # gpt-4 was default, throws rate-limit error
```

crewAI Tools

```python
In [4]:   search_tool = SerperDevTool()
          scrape_tool = ScrapeWebsiteTool()
          read_resume = FileReadTool(file_path='./fake_resume.md')
          semantic_search_resume = MDXSearchTool(mdx='./fake_resume.md')
```

```
Inserting batches in chromadb: 100%|███████████| 1/1 [00:00<00:00,  2.06it/s]
```

- Uncomment and run the cell below if you wish to view `fake_resume.md` in the notebook.

```python
In [5]:   # from IPython.display import Markdown, display
          # display(Markdown("./fake_resume.md"))
```

Creating Agents

```python
In [6]:   # Agent 1: Researcher
          researcher = Agent(
              role="Tech Job Researcher",
              goal="Make sure to do amazing analysis on  job posting to help job applicants",
              tools = [scrape_tool, search_tool],
              verbose=True,
              backstory="""
                  "As a Job Researcher, your prowess in "
                  "navigating and extracting critical "
                  "information from job postings is unmatched."
```

```
                "Your skills help pinpoint the necessary "
                "qualifications and skills sought "
                "by employers, forming the foundation for "
                "effective application tailoring."
        """.replace('"',''),
    )
```

In [7]:
```python
# Agent 2: Profiler
profiler = Agent(
    role="Personal Profiler for Engineers",
    goal="Do increditble research on job applicants  to help them stand out in the job market",
    tools = [scrape_tool, search_tool, read_resume, semantic_search_resume],
    verbose=True,
    backstory="""
        "Equipped with analytical prowess, you dissect "
        "and synthesize information "
        "from diverse sources to craft comprehensive "
        "personal and professional profiles, laying the "
        "groundwork for personalized resume enhancements."
    """.replace('"',''),
)
```

In [8]:
```python
# Agent 3: Resume Strategist
resume_strategist = Agent(
    role="Resume Strategist for Engineers",
    goal="Find all the best ways to make a  resume stand out in the job market.",
    tools = [scrape_tool, search_tool, read_resume, semantic_search_resume],
    verbose=True,
    backstory="""
        "With a strategic mind and an eye for detail, you "
        "excel at refining resumes to highlight the most "
        "relevant skills and experiences, ensuring they "
        "resonate perfectly with the job's requirements."
    """.replace('"',''),
)
```

In [9]:
```python
# Agent 4: Interview Preparer
interview_preparer = Agent(
    role="Engineering Interview Preparer",
    goal="Create interview questions and talking points  based on the resume and job requirements",
    tools = [scrape_tool, search_tool, read_resume, semantic_search_resume],
```

```python
        verbose=True,
        backstory="""
            "Your role is crucial in anticipating the dynamics of "
            "interviews. With your ability to formulate key questions "
            "and talking points, you prepare candidates for success, "
            "ensuring they can confidently address all aspects of the "
            "job they are applying for."
        """.replace('"',''),
    )
```

Creating Tasks

```python
In [10]:   # Task for Researcher Agent: Extract Job Requirements
           research_task = Task(
               description="""
                   "Analyze the job posting URL provided ({job_posting_url}) "
                   "to extract key skills, experiences, and qualifications "
                   "required. Use the tools to gather content and identify "
                   "and categorize the requirements."
               """.replace('"',''),
               expected_output="A structured list of job requirements, including necessary skills, qualifications, and
               agent=researcher,
               async_execution=True
           )
```

```python
In [11]:   # Task for Profiler Agent: Compile Comprehensive Profile
           profile_task = Task(
               description="""
                   "Compile a detailed personal and professional profile "
                   "using the GitHub ({github_url}) URLs, and personal write-up "
                   "({personal_writeup}). Utilize tools to extract and "
                   "synthesize information from these sources."
               """.replace('"',''),
               expected_output="""
                   "A comprehensive profile document that includes skills, "
                   "project experiences, contributions, interests, and communication style."
               """.replace('"',''),
               agent=profiler,
```

```
        async_execution=True
)
```

- You can pass a list of tasks as `context` to a task.
- The task then takes into account the output of those tasks in its execution.
- The task will not run until it has the output(s) from those tasks.

In [12]:
```python
# Task for Resume Strategist Agent: Align Resume with Job Requirements
resume_strategy_task = Task(
    description="""
        "Using the profile and job requirements obtained from "
        "previous tasks, tailor the resume to highlight the most "
        "relevant areas. Employ tools to adjust and enhance the "
        "resume content. Make sure this is the best resume even but "
        "don't make up any information. Update every section, "
        "inlcuding the initial summary, work experience, skills, "
        "and education. All to better reflrect the candidates "
        "abilities and how it matches the job posting."
    """.replace('"',''),
    expected_output="""
        "An updated resume that effectively highlights the candidate's "
        "qualifications and experiences relevant to the job."
    """.replace('"',''),
    output_file="tailored_resume.md",
    context=[research_task, profile_task],
    agent=resume_strategist
)
```

In [13]:
```python
# Task for Interview Preparer Agent: Develop Interview Materials
interview_preparation_task = Task(
    description="""
        "Create a set of potential interview questions and talking "
        "points based on the tailored resume and job requirements. "
        "Utilize tools to generate relevant questions and discussion "
        "points. Make sure to use these question and talking points to "
        "help the candiadte highlight the main points of the resume "
        "and how it matches the job posting."
    """.replace('"',''),
    expected_output="""
```

```
            "A document containing key questions and talking points "
            "that the candidate should prepare for the initial interview."
    """.replace('"',''),
    output_file="interview_materials.md",
    context=[research_task, profile_task, resume_strategy_task],
    agent=interview_preparer
)
```

Creating the Crew

```
In [14]:  job_application_crew = Crew(
              agents=[researcher,
                      profiler,
                      resume_strategist,
                      interview_preparer],

              tasks=[research_task,
                     profile_task,
                     resume_strategy_task,
                     interview_preparation_task],

              verbose=True
          )
```

Running the Crew

- Set the inputs for the execution of the crew.

```
In [15]:  job_application_inputs = {
              'job_posting_url': 'https://jobs.lever.co/AIFund/6c82e23e-d954-4dd8-a734-c0c2c5ee00f1?lever-origin=app
              'github_url': 'https://github.com/joaomdmoura',
              'personal_writeup': """
                  Noah is an accomplished Software Engineering Leader with 18 years of experience, specializing in

Final Answer:
Name: João Moura
Location: São Paulo, SP, Brazil
GitHub Username: joaomdmoura
GitHub Followers: 1.9k
GitHub Following: 20
Website: http://joaomdmoura.com

Professional Summary:
João Moura is an accomplished Software Engineering Leader with 18 years of experience, specializing in managing remote and in-office teams. He is an expert in multiple programming languages and frameworks. João holds an MBA and has a strong background in AI and data science. He has successfully led major tech initiatives and startups, proving his ability to drive innovation and growth in the tech industry. João is ideal for leadership roles that require a strategic and innovative approach.

GitHub Profile Overview:
- Repositories: 70
- Stars: 85
- Organizations: Developer Program Member
- Featured Projects: crewAI, machinery, active_model_serializers, gioco, sigma, keeper

Featured Projects:
1. crewAI: Framework for orchestrating role-playing, autonomous AI agents. By fostering collaborative intelligence, CrewAI empowers agents to work together seamlessly, tackling complex tasks.
2. machinery: Elixir State machine thin layer for structs
3. active_model_serializers: ActiveModel::Serializer implementation and Rails hooks
4. gioco: A gamification gem for Ruby on Rails applications
5. sigma: A ranking algorithm implementation for Ruby on Rails applications
6. keeper: Flexible and simple authentication solution for Phoenix

Communication Style:
João's GitHub profile reflects someone who is dedicated, experienced, and innovative. His project contributions demonstrate his expertise in various programming languages and his ability to lead technical initiatives effectively. He maintains a professional and collaborative approach in his work, evident through his active involvement in open-source projects and his engagement with the developer community.

Overall, João Moura's profile showcases a seasoned Software Engineering Leader with a strong technical background, leadership skills, and a track record of driving innovation in the tech industry. He is well-suited for leadership roles that require a strategic and innovative approach.

> Finished chain.

career - Full Stack EngineerFull Stack EngineerColombiaAI Fund — AI Fund /Full time /Apply for this jobJob Description:We are looking for Full Stack Engineers to produce scalable software solutions for our portfolio companies. You'll be part of a cross-functional and will be responsible for the full software development life cycle, from conception to deployment.As a Full Stack Developer, you should be comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.What You Will be Doing:- Work with development teams and product managers to ideate software solutions- Build the front-end of applications through appealing visual design- Develop and manage well-functioning databases and applications- Write effective APIs- Test software to ensure responsiveness and efficiency- Troubleshoot, debug and upgrade software- Create security and data protection settings- Build features and applications What You Must Bring:Must Haves:- Proven experience as a Full Stack Developer or similar role- Experience developing desktop and mobile applications- Familiarity with common stacks- Knowledge of multiple front-end languages and libraries (e.g. HTML/ CSS, JavaScript, XML, jQuery)- Knowledge of multiple object-oriented languages (e.g. Java, Python) and multiple frameworks (e.g. Angular, React, Node.js)- Familiarity with databases (e.g. MySQL, MongoDB), web servers (e.g. Apache) and UI/UX design- Excellent communication skills and the ability to have in-depth technical discussions with both the engineering team and business people- Excellent English language skills- Self-starter and comfort working in an early-stage environment- Strong project management and organizational skillsNice to Haves:- BSc in Computer Science, Mathematics or similar field; Master's or PhD degree is a plus- Understanding of AI/ML models- Understanding of big data tools, including Hadoop, Spark, Kafka, etc.- Proficiency in HTML, CSS and JavaScript- Experience with consumer applications and data handling- Familiarity with data

privacy regulations and best practicesCharacteristics:Accountability: an obligation or willingness to accept responsibility or to account for one's actions while doing so with the highest regard for integrity. Grit. able to stick with projects and work hard through good and bad times. High pain tolerance and can perform well under stress or pressure.Scrappy: Takes initiative and proactively gets things done with low resources, but doing creative things, begging, borrowing, and whatever is needed in an ambiguous environment or situation.Ownership orientation: Demonstrated orientation of extreme ownership over all aspects of the product and extremely results-driven in nature.We are committed to providing an environment of mutual respect where equal employment opportunities are available to all applicants without regard to race, color, religion, sex, pregnancy (including childbirth, lactation and related medical conditions), national origin, age, physical and mental disability, marital status, sexual orientation, gender identity, gender expression, genetic information (including characteristics and testing), military and veteran status, and any other characteristic protected by applicable law. AI Fund believes that diversity and inclusion among our employees is critical to our success as a company, and we seek to recruit, develop and retain the most talented people from a diverse candidate pool. Selection for employment is decided on the basis of qualifications, merit, and business need.Apply for this jobJobs powered by

Final Answer:
- **Proven experience as a Full Stack Developer or similar role**
- **Experience developing desktop and mobile applications**
- **Familiarity with common stacks**
- **Knowledge of multiple front-end languages and libraries (e.g. HTML/ CSS, JavaScript, XML, jQuery)**
- **Knowledge of multiple object-oriented languages (e.g. Java, Python) and multiple frameworks (e.g. Angular, React, Node.js)**
- **Familiarity with databases (e.g. MySQL, MongoDB), web servers (e.g. Apache) and UI/UX design**
- **Excellent communication skills and the ability to have in-depth technical discussions with both the engineering team and business people**
- **Excellent English language skills**
- **Self-starter and comfort working in an early-stage environment**
- **Strong project management and organizational skills**
Nice to Haves:
- **BSc in Computer Science, Mathematics or similar field; Master's or PhD degree is a plus**
- **Understanding of AI/ML models**
- **Understanding of big data tools, including Hadoop, Spark, Kafka, etc.**
- **Proficiency in HTML, CSS and JavaScript**
- **Experience with consumer applications and data handling**
- **Familiarity with data privacy regulations and best practices**

Relevant Content:
DriveAI: Senior Software Engineer (remote) — 2015 - 2016
- Developed and optimized a central API that significantly improved the functionality used by a large engineering team and thousands of users, enhancing overall system performance and user satisfaction.
- Implemented several critical enhancements, including advanced caching strategies that drastically reduced response times and system loads.

BetCraft: CTO — 2013 - 2015
- Led the technology strategy post-Series A funding, directly reporting to the board and guiding the company through a phase of significant technological advancement and network expansion.
- His strategic initiatives and partnerships significantly improved platform performance and expanded the company's market reach.
- Helped build his initial product using both React and Angular and got pretty good at it.

Noah Williams is an ideal candidate for senior executive roles, particularly in companies seeking leadership with a robust blend of technical and strategic expertise.

Noah Williams
- Email: noah.williams@example.dev
- Phone: +44 11 111 11111

Profile
Noah Williams is a distinguished Software Engineering Leader with an 18-year tenure in the technology industry, where he has excelled in leading both remote and in-office engineering teams. His expertise spans across software development, process innovation, and enhancing team collaboration. He is highly proficient in programming languages such as Ruby, Python, JavaScript, TypeScript, and Elixir, alongside deep expertise in various front end frameworks. Noah's significant experience in data science and machine learning has enabled him to spearhead successful deployments of scalable AI solutions and innovative data model development.

Profile
Noah Williams is a distinguished Software Engineering Leader with an 18-year tenure in the technology indus try, where he has excelled in leading both remote and in-office engineering teams. His expertise spans acro ss software development, process innovation, and enhancing team collaboration. He is highly proficient in p rogramming languages such as Ruby, Python, JavaScript, TypeScript, and Elixir, alongside deep expertise in various front end frameworks. Noah's significant experience in data science and machine learning has enable d him to spearhead successful deployments of scalable AI solutions and innovative data model development.

Work History

DataKernel: Director of Software Engineering (remote) — 2022 - Present
- Noah has transformed the engineering division into a key revenue pillar for DataKernel, rapidly expanding the customer base from inception to a robust community.
- He spearheaded the integration of cutting-edge AI technologies and the use of scalable vector databases, which significantly enhanced the product's capabilities and market positioning.
- Under his leadership, the team has seen a substantial growth in skill development, with a focus on achiev ing strategic project goals that have significantly influenced the company's direction.
- Noah also played a critical role in defining the company's long-term strategic initiatives, particularly in adopting AI technologies that have set new benchmarks within the industry.

DataKernel: Senior Software Engineering Manager (remote) — 2019 - 2022
- Directed the engineering strategy and operations in close collaboration with C-level executives, playing a pivotal role in shaping the company's technological trajectory.
- Managed diverse teams across multiple time zones in North America and Europe, creating an environment of transparency and mutual respect which enhanced team performance and morale.
- His initiatives in recruiting, mentoring, and retaining top talent have been crucial in fostering a cultu re of continuous improvement and high performance.

InnovPet: Founder & CEO (remote) — 2019 - 2022
- Noah founded InnovPet, a startup focused on innovative IoT solutions for pet care, including a revolution ary GPS tracking collar that significantly enhanced pet safety and owner peace of mind.

- He was responsible for overseeing product development from concept through execution, working closely with engineering teams and marketing partners to ensure a successful market entry.
- Successfully set up an advisory board, established production facilities overseas, and navigated the company through a successful initial funding phase, showcasing his leadership and entrepreneurial acumen.
- Built the initial version of the product leveraging MongoDB

EliteDevs: Engineering Manager (remote) — 2018 - 2019
- Noah was instrumental in formulating and executing strategic plans that enhanced inter-departmental coordination and trust, leading to better project outcomes.
- He managed multiple engineering teams, fostering a culture that balances productivity with innovation, and implemented goal-setting frameworks that aligned with the company's long-term goals.
- Was a bery hands on manager using ruby on rails and react to build out a new product.

PrintPack: Engineering Manager (remote) — 2016 - 2018
- Led the formation and development of a high-performance engineering team that was pivotal in increasing company revenue by 500% within two years.
- His leadership in integrating data analytics into business decision-making processes led to the development of a predictive modeling tool that revolutionized customer behavior analysis.

DriveAI: Senior Software Engineer (remote) — 2015 - 2016
- Developed and optimized a central API that significantly improved the functionality used by a large engineering team and thousands of users, enhancing overall system performance and user satisfaction.
- Implemented several critical enhancements, including advanced caching strategies that drastically reduced response times and system loads.

Final Answer:

Interview Questions and Talking Points for João Moura:

1. Can you elaborate on your experience as a Full Stack Developer and how it aligns with the requirements of this role?

2. You have worked on multiple programming languages and frameworks. Can you discuss a specific project where you utilized your diverse skill set to create impactful solutions?

3. How have you incorporated UI/UX design principles in your previous projects, especially in desktop and mobile applications development?

4. Given your expertise in front-end languages and libraries like HTML/CSS, JavaScript, XML, and jQuery, can you provide examples of innovative front-end solutions you have implemented?

5. In your role as a Software Engineering Leader, how have you managed to have in-depth technical discussions with both the engineering team and business stakeholders effectively?

6. Tell us about a challenging project where you demonstrated strong project management skills and how you navigated through it successfully.

7. How do you stay updated with the latest technologies and trends in the industry, especially in areas like AI/ML models and big data tools?

8. Considering your background in AI and data science, can you share a project where you applied these skills to drive innovation and growth?

9. Your experience with various databases and web servers is impressive. How do you ensure the optimal performance of applications by selecting the right tools for the job?

10. Can you walk us through a project where you had to work in an early-stage environment and how you adapted to the challenges it presented?

11. How do you approach team collaboration and fostering a culture of continuous improvement and high performance, based on your previous leadership roles?

12. Given your proficiency in HTML, CSS, and JavaScript, can you discuss a project where you leveraged these skills to create a seamless user experience?

13. How do you handle data privacy regulations and best practices in your development projects to ensure compliance and security?

14. Can you share a specific example where you utilized your knowledge of multiple object-oriented language

s and frameworks to deliver a scalable and efficient solution?

15. Lastly, how do you see your experience, skills, and achievements aligning with the strategic and innova
tive approach required for this role?

These questions and talking points aim to help João Moura showcase his expertise, experience, and capabilit
ies relevant to the Full Stack Developer position, highlighting his accomplishments and skills that match t
he job requirements.
